BARANDAS DE VIDRIO DE  
ALTA PRESTACION  
C/ZOCALOS

# MODELO A10

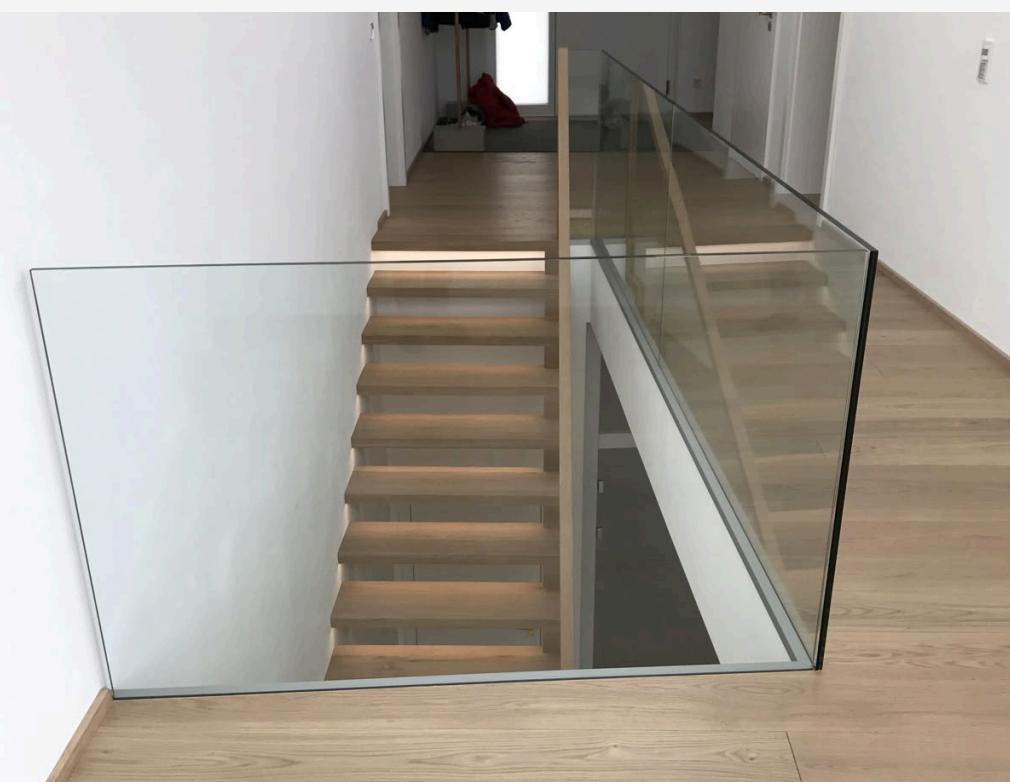

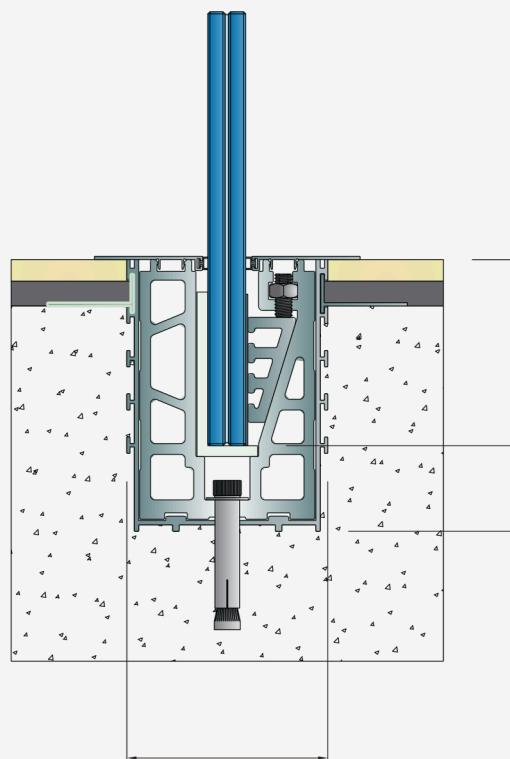

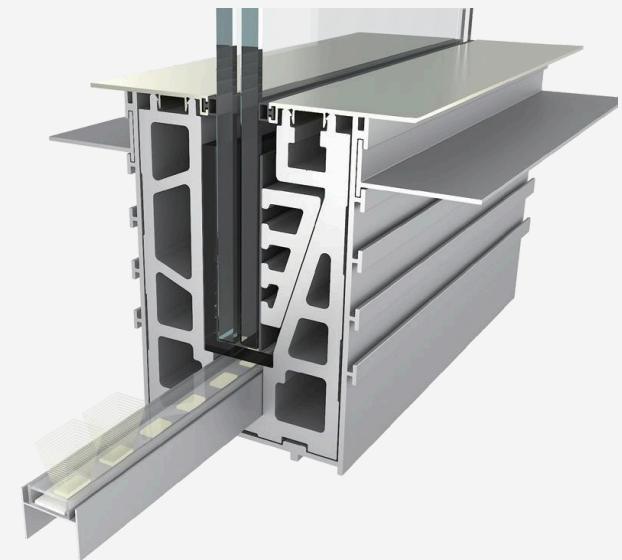

Sistema premium de baranda continua con vidrio templado laminado. Ideal para balcones, terrazas y zonas de alto tránsito. Instalación sobre superficie terminada, con gran firmeza y estética minimalista. Compatible con vidrio recto o curvo y con iluminación LED integrada.

# MODELO A20

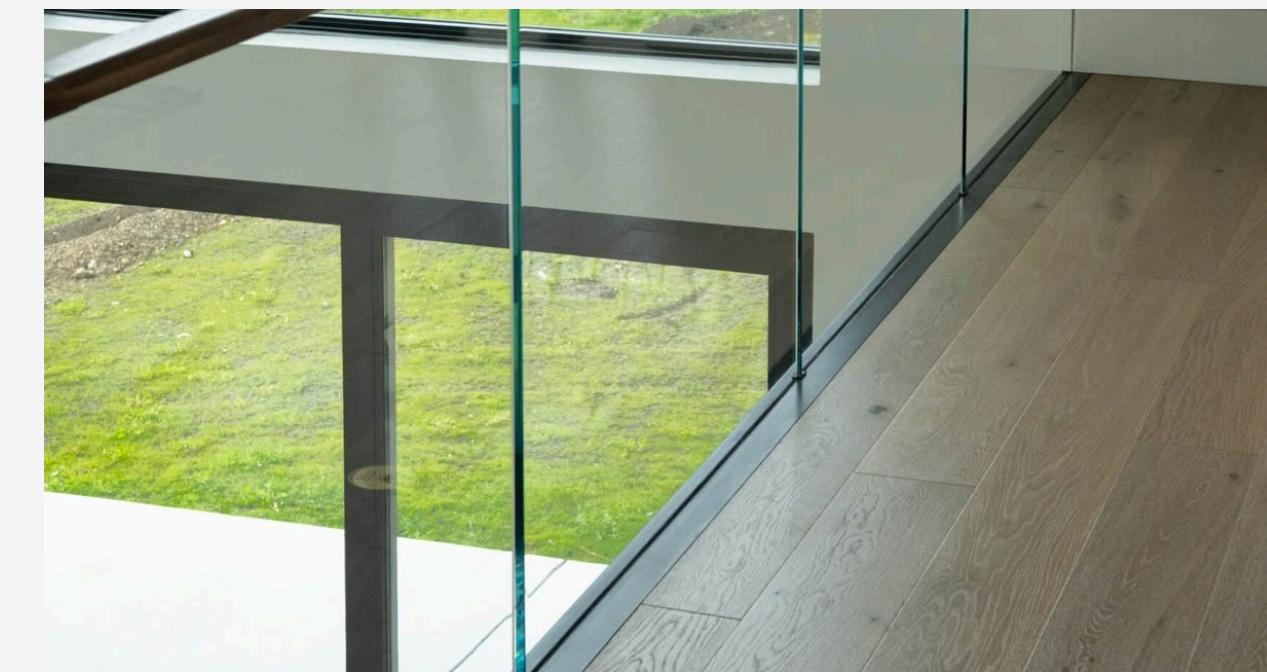

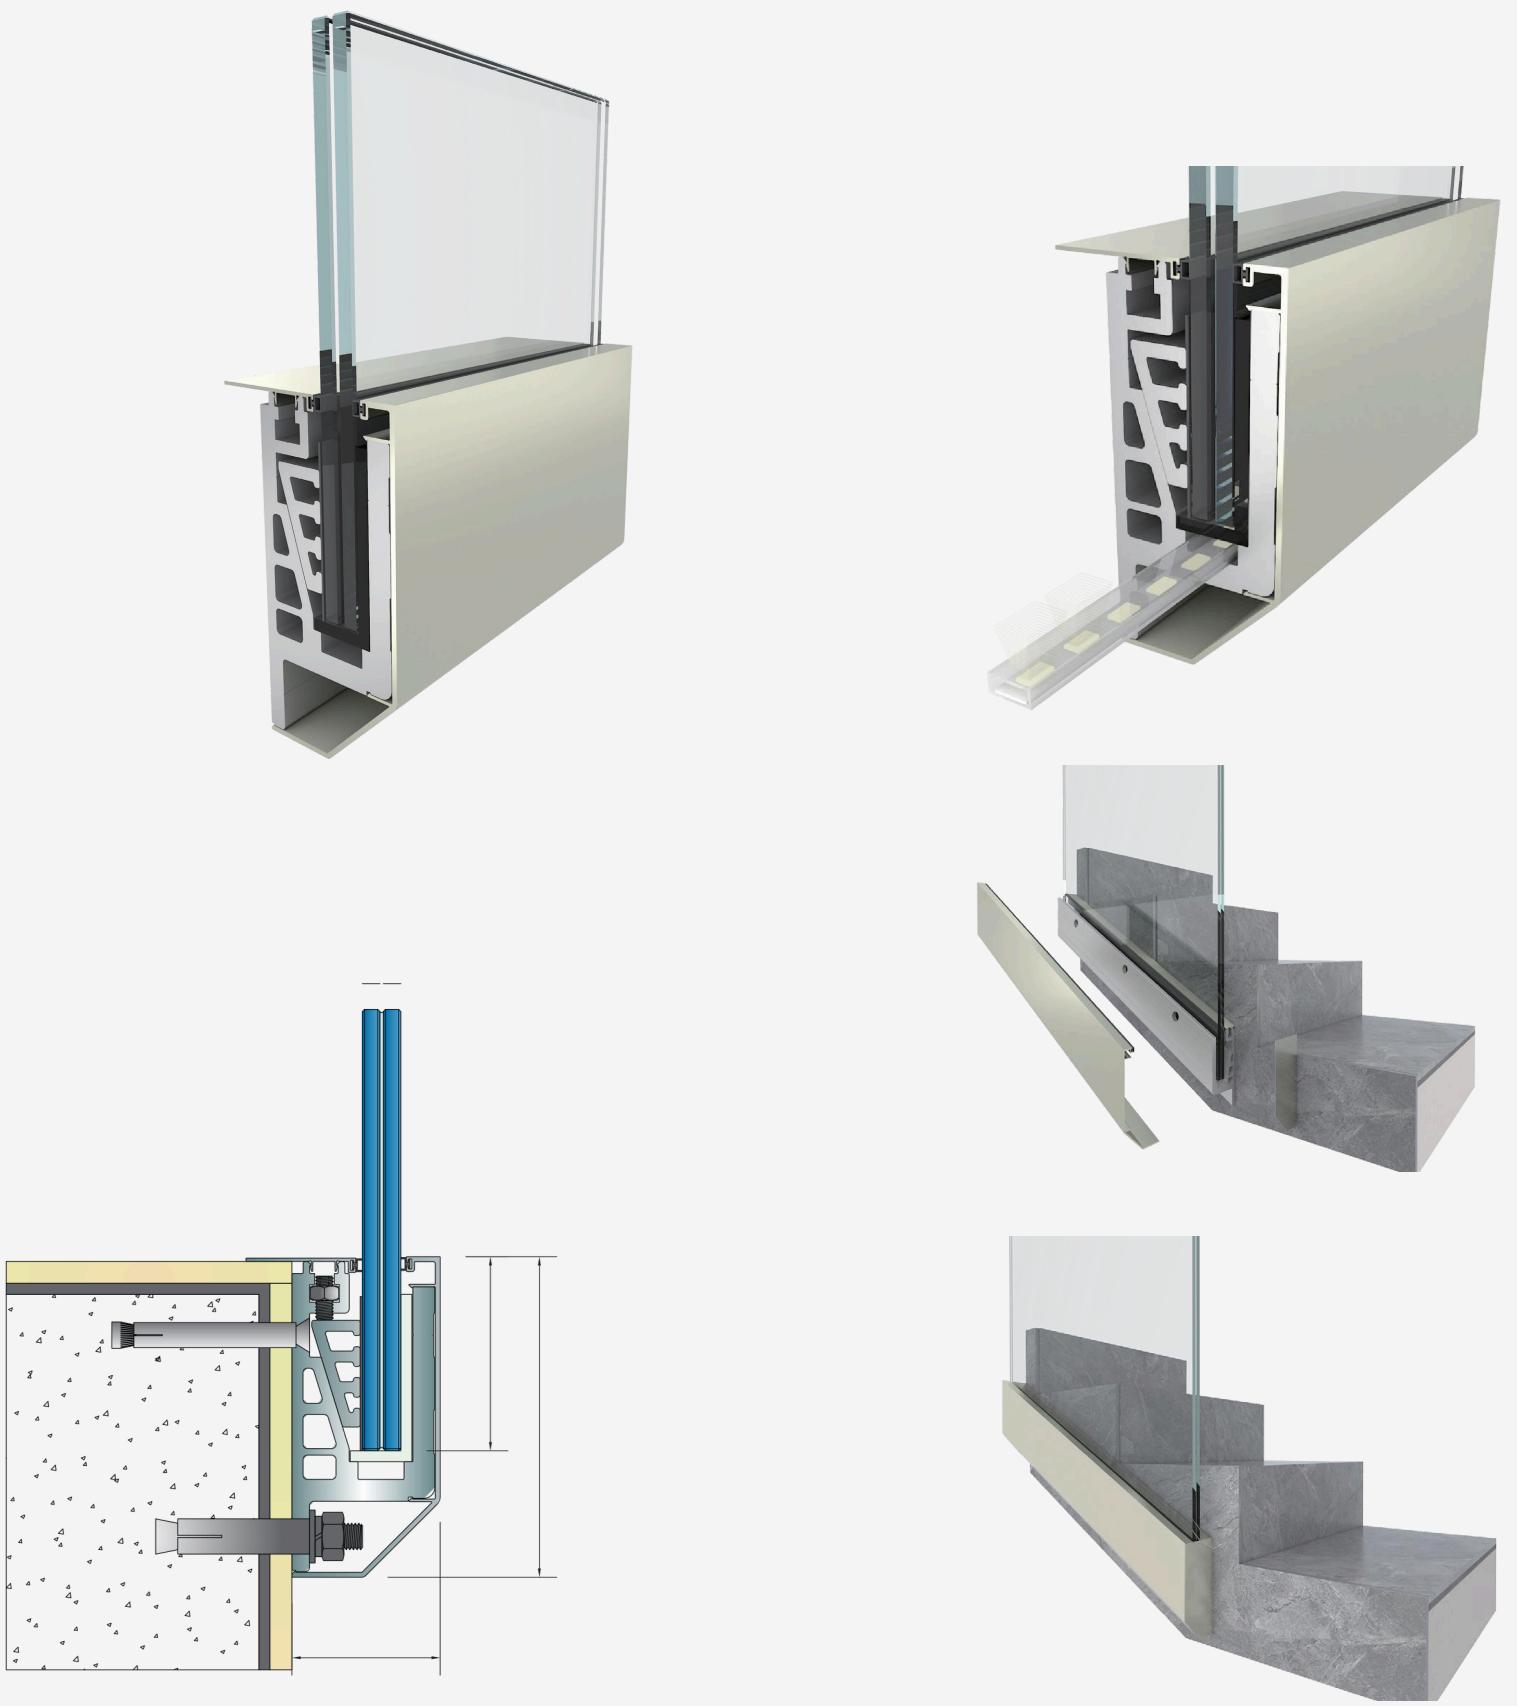

Sistema oculto que deja el vidrio completamente limpio y sin perfiles visibles. Se instala embutido en la losa o carpeta, logrando el máximo nivel estético. Perfecto para desarrollos modernos que buscan continuidad visual y seguridad estructural superior.

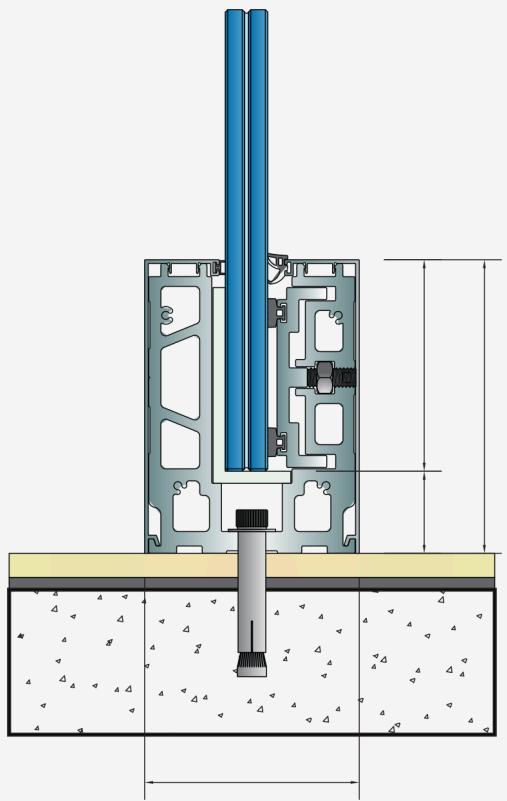

# MODELO A30

Sistema de fijación lateral para liberar la superficie del piso. Excelente para balcones con poco espacio o diseños donde el vidrio debe salir al borde.

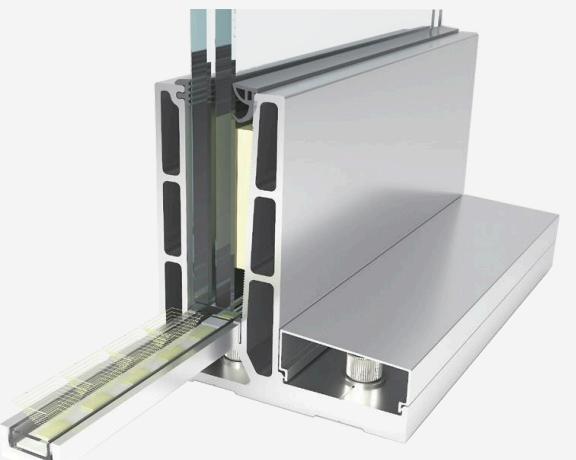

Acabado elegante, estructura robusta y posibilidad de integrar iluminación LED.

# MODELO A40

Perfil reforzado para exigencias mayores de carga y proyectos de mediana y gran escala. Aporta estabilidad superior, montaje rápido y terminación estética con tapas y cubretornillos. Ideal para edificios, hoteles y zonas comerciales.

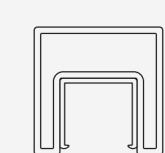

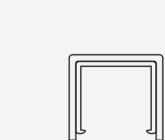

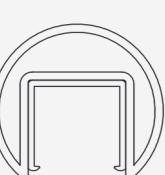

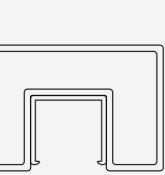

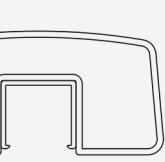

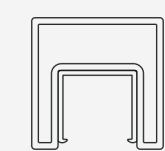

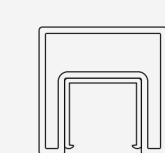

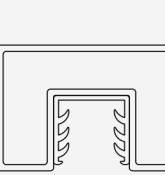

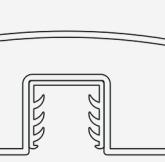

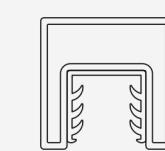

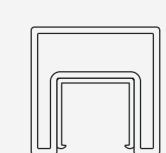

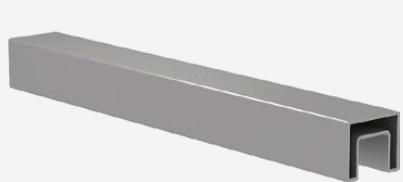

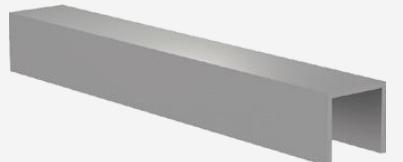

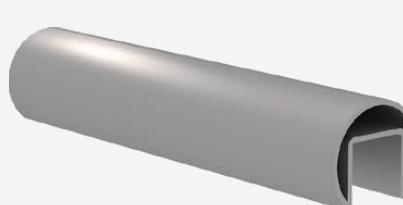

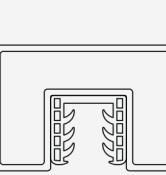

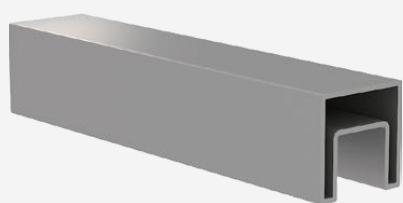

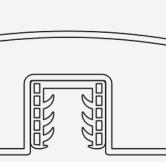

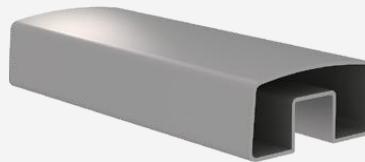

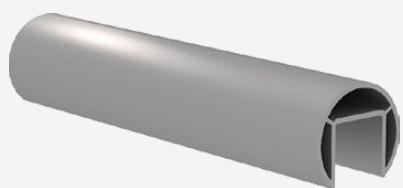

# MODELO A60

Diseño ultradelgado que mantiene la resistencia estructural requerida.

Proporciona la máxima transparencia y elegancia con un perfil mínimo. Ideal para obras premium con estética contemporánea.
